

LASER MARKING

AREX: LASER MARKING MADE EASY

The AREX Series is a multi-functional and all inclusive line of fiber laser markers dedicated to direct part marking in the Automotive, Electronics, and precision mechanics industry. Thanks to its ultra-compact scanhead, flexible marking platform and advanced software features, AREX laser marker provides a flexible, reliable, cost effective solution for permanent and indelible high quality marking directly on your production line. AREX laser markers are equipped with high performance pulsed fiber laser sources with power levels from 10W to 50W and with the new 20W MOPA fiber source based on the proprietary MULTIWAVE fiber laser technology for maximum control of laser emission. The AREX series offers more than just a laser marker. AREX's Embedded Marking Controller simplifies setup, configuration and management of single or multiple laser markers, both in stand-alone or in master-slave configuration. The AREX Series is a simple and complete solution for any laser marking application.

APPLICATIONS

METAL MARKING

- AREX fiber laser marker series provides unmatched performance and functionality on metal
- High resolution, excellent contrast with low thermal impact
- Quick and clear black laser annealing, without cracks
- High quality deep engraving

HIGH CONTRAST MARKING

- High contrast marking on color enhanced plastics
- High speed on PCB and electronic devices

Quick installation and setup

AREX design and configuration dramatically simplifies and speeds up machine design and system integration.

- Embedded Marking Controller (EMC) with LIGHTER Suite ensures quick and easy installation, setup, control and system diagnostics, even remotely via Ethernet TCP/IP
- Ultra compact scan head (112x300x90mm) saves space and reduced costs during installation and setup
- Built-in step motor controller, completely integrated in software editor, dramatically simplifies integration of rotary indexers, x-y tables and z axis
- Front panel USB for quick and easy system update and layout transfer

Flexible programming and control

LIGHTER Suite, with its intuitive and easy-to-learn interface, simplifies the development of a complete and cost effective Laser Marking Station for OEM and Machine builders. AREX can be operated in a STAND ALONE MODE with built-in control and software resources, and in a MASTER-SLAVE mode with a supervising computer for advanced network-oriented Laser Marking Applications.

Main built-in features are:

- Advanced Graphical Layout
- Local and Remote laser diagnostic
- Local and Remote I/O & axis control
- Local and Remote laser test & setup
- Local and Remote ActiveX
- Ethernet protocol for easy integration PLC and industrial environments
- Marking On-the-Fly capabilities

AREX SERIES

		AREX	AREX 20	AREX 30	AREX 50	AREX 20MW
Nominal power	[W]	>10	>20	30	50	>20
Pulse energy (max)	[mJ]	0,5	1,0	1,0	1,0	0,6
Peak power (max)	[kW]	5	10	11	10	12
Modulation	kHz	20 ÷ 100		30 ÷ 200	50 ÷ 200	20 ÷ 500
Laser source		Pulsed Fiber Laser				M.O.P.A. Fiber Laser
Pulsewidth (Typ)	[ns]	FIXED: 100				Adj: 4, 8, 12, 30, 50, 100, 200, 250
Wavelength	[nm]	1050÷1080				
Marking capabilities		Static, Rotary axis, On the fly (marking in motion)				
Fiber length	[m]	3				
Integration		Up to 4 mechanical axis driving capabilities (built in stepper motors controller) Up to 10 digital inputs and 10 digital output fully programmable dedicated connectors Encoder and Photocell				
Aiming & Focus Beam		Semiconductor laser @ 635nm				
Interfaces		4 x USB, 1 x Ethernet, 1 x RS232, Digital I/O				
Protection rating		Head: IP54; Controller: IP 21				
Cooling		Forced air				
Power Supply		100/240 VAC – 50/60 Hz – 330 W (MAX)				
Head Dimensions & Weight		90mm x 112mm x 300mm – 3 kg				
Controller Dimensions & Weight		111mm x 430 mm x 370 mm – 16 kg				

AREX PULSED

MARKING MADE EASY

High performance and reliability

- Low leakage to avoid ghost lines or material damage even on sensitive materials
- High protection rate scanhead, IP54 for maximum performance even in aggressive environment
- Complete power range from 10 W to 50W
- Standard Datalogic I/O Interface
- Integrated Windows based markign controller, no external PC needed.
- Full Lighter Software included, no dongle needed
- Aiming Beam and Focus Beam
- RS232 and Ethernet protocol

INDUSTRIES

AUTOMOTIVE, INDUSTRIAL ELECTRONICS, PRECISION MECHANICS, SURGICAL TOOLS & IMPLANTS

APPLICATIONS

- High contrast marking & engraving for branding & traceability on: Stainless steel, high-grade steel, steel, carbon steel, copper, iron, ferrous metals, magnesium, aluminum, brass, gold, silver, platinum, titanium
- 'Aesthetic' plastic marking
Polycarbonate (PC) Polysulfone (PSU), Polyphenylene sulfide (PPS)
- 'Non- aesthetic' plastic marking for traceability
Polystyrene (PC), Styrene acrylonitrile (SAN), Acrylonitrile Butadiene Styrene (ABS), Polyethylene terephthalate (PET) Polybutylene terephthalate (PBT)
- Additivated plastic marking
Polyamide (PA), Polyoxymethylene (POM) Polypropylene (PP), Polyethylene (PE) and many other

AREX M

FLEXIBLE LASER PERFORMANCE

High flexibility and marking repeatability

The AREX family delivers a high level of performance for high precision marking

Additional features:

- Linear power range from 0,1W to full power for precise marking even on sensitive materials
- Pulsewidth adjustment from 4 ns to 250 ns for best process optimization and repeatability
- High repetition rate up to 500KHz for faster marking and accurate texturing
- High peak power for extended process capability
- Standard Datalogic I/O interface

INDUSTRIES

AUTOMOTIVE, AEROSPACE, INDUSTRIAL ELECTRONICS, MOBILE & SEMICON ELECTRONICS, PRECISION MECHANICS, WATCH & JEWELRY, SURGICAL TOOLS & IMPLANTS

APPLICATIONS

- High precision contrast marking and annealing for branding & traceability on: stainless steel, high-grade steel, steel, carbon steel, iron, ferrous metals, magnesium, aluminum, brass, gold, platinum, titanium ...
- 'Aesthetic' plastic marking for branding and texturing Polycarbonate (PC) Polysulfone (PSU), Polyphenylene sulfide (PPS), Polyether ether ketone (PEEK)
- High contrast plastic marking for traceability Polystyrene (PS), Styrene acrylonitrile (SAN), Acrylonitrile Butadiene Styrene (ABS), Polyethylene terephthalate (PET) Polybutylene terephthalate (PBT) Polyoxymethylene (POM)
- Color enhanced plastic Polyamide (PA), Polypropylene (PP), Polyethylene (PE) and many other
- Coating removal/night & day application
- Color marking on metal
